

# Ikboljon Abdurasulov

## Full-stack developer

✉ [ikboljonme@gmail.com](mailto:ikboljonme@gmail.com) 🌐 [ikboljon.com](http://ikboljon.com) in <https://www.linkedin.com/in/ikboljonme/>

### Skills

**FRONT END DEVELOPMENT** (ReactJs, Javascript, Bootstrap Redux, MUI, HTML, Responsive UI with CSS)

**BACKEND DEVELOPMENT** (Node.js, Express, SQL)

**DATABASES** (Caching, NoSQL Databases(Firebase, MongoDB PostgreSQL), REST APIs)

**TECHNOLOGIES** (Docker, Kubernetes, Git version control(Github, Gitlab, Bitbucket))

### Education

#### Math/Physics - SCHOOL

*Specialised School Number 4*

2012 – 2019 | Fergana, Uzbekistan

- Improved my specialized education in Mathematics and Physics to gain an in-depth understanding of these subjects, surpassing traditional educational standards. This experience sparked a passion for mathematics and inspired me to participate in Math Olympiads.
- Earned 3rd place in regional math olympiad, demonstrating advanced problem-solving skills and a strong aptitude for mathematics.

#### Astronomy/Physics /informatics - HIGH SCHOOL

*Astronomical School Named Mizo Ulug'bek* 📍

2019 – 2021 | Tashkent, Uzbekistan

- Acquired expertise in informatics during my academic specialization, gaining proficiency in various programming skills and technologies.
- Collaborated as a volunteer team member to deliver a web application for a school authority, utilizing my skills in web development to meet project requirements and deadlines.

#### English philology - Bachelor's degree

*Wszechnica Polska* 📍

2022 – present | Warsaw, Poland

- Still actively studying and practicing the English language to improve proficiency.

### Professional Experience

#### Web Developer

*RADCODE* 📍

09/2022 – present | Warsaw, Poland

- Contributed to the creation of high-quality web-based applications and software solutions for clients, utilizing React, Prisma and PostgreSQL. Optimized specific parts of project to enhance performance and user experience.
- Implemented multi-stage services in Docker containerization to optimize debugging and caching, leading to a more efficient workflow with reduced caching time and faster debugging
- Refactored the HTTP requests to RESTful services in multiple projects to conform to industry standards and utilized external libraries like SWR and React Query to simplify data management and improve code quality.

#### Volunteer Software Developer - INTERNSHIP

*School Authorities*

2019 – 2021 | Tashkent, Uzbekistan

- Developed a real-time blog project for a school using WordPress, utilizing plugins to meet specific requirements and improve functionality
- Designed the UI of web-based applications using CSS, with a focus on creating responsive layouts. Also identified non-responsive parts of the project and implemented responsive design updates to improve the user experience.

### Interests

**Solving coding problems** 📍 (I like sharpening my problem-solving skills through challenging coding problems, using LeetCode as a valuable resource. Additionally, I enjoy sharing my own solutions with others on the platform to assist in their learning.),  
**Love of learning** (I have a love of learning and enjoy exploring new tools and technologies, constantly seeking to expand my skillset and stay up-to-date with industry developments)
